FORKLIFT TRUCKS**

Mitsubishi: the name people trust

All around the world, people who depend on their forklift trucks, put their trust in Mitsubishi. If your forklift truck carries our name you can be certain of the utmost quality and reliability.

But it doesn't end there. As your authorised Mitsubishi Forklift Truck dealership we are also unique in the way we operate. You'll find our highly skilled people are probably closer than you've come to expect: with everything from an exceptional wide range of equipment to all the services you need such as hire and finance.

Experienced, highly trained and friendly, we are certain you'll find them partners you can trust as much as the Mitsubishi name itself.

We're backed, of course, by excellent channels to our national and global Mitsubishi colleagues, so what we don't have to hand, is in our hands, fast.

You enjoy all the benefits of our global resources and local support.

Mitsubishi gives you more

With Mitsubishi, a very generous, practical specification is yours as standard – including many items that other manufacturers offer only as costly extras.

The result is a truck that's more productive and profitable for your business. More economical for you to run and maintain. More environmentally friendly. And more efficient and enjoyable for your drivers to operate.

the green diamond

GRENDIA

Our most popular forklift range, GRENDIA means 'green diamond'. Green for its low fuel consumption, low emissions and low tyre wear... Diamond because it's tough, high quality and always a sound investment. No wonder it's the world's favourite forklift.

quality, reliability... and genuine value for money

Innovative design, cutting-edge technology and uncompromising quality are standards that define everything we do.

Our award-winning product development team are world leaders in achieving the ultimate in 'driveability'. At the same time, they define the 'green' standards for fuel economy and low emissions.

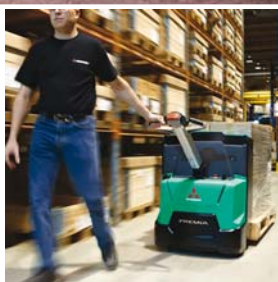

Durable materials, low-wear systems and built-in protection all extend the trucks working life and extend service intervals.

Meanwhile, **RapidAccess** features encourage your staff to carry out routine checks by making the process quick and easy – ensuring proper maintenance and so cutting your running costs.

Mitsubishi makes good business sense

A Mitsubishi truck is an asset to your business that will make you money – and save you money – every day. Our famously reliable trucks just keep on working longer – avoiding unscheduled downtime and maximising your productivity.

With a range that includes over 150 different models, each available with a myriad of options, Mitsubishi are certain to offer precisely the right truck for your exact needs.

world-leading technology... and local support

Market-leading customer care is an essential part of the unique Mitsubishi package. Every dealer has been hand-picked for its facilities, knowledge and commitment to our customers. And we are all backed by the huge resources of the global Mitsubishi organisation.

Wherever you are working – on a single site or across the country – we bring you the local knowledge and expertise to ensure the best possible solution for your business.

maintenance agreements

Our Planned Maintenance and Full Maintenance programs deliver cost-effective, scheduled support. They are much more than just preventative – they save you time and money too. We work with you to develop a program geared to the specific demands of your operation, ensuring that your trucks always deliver peak productivity. So while we concentrate on your forklifts, you can concentrate on your business.

parts

To ensure your equipment is repaired quickly every time, we hold large stocks of approved parts. In addition, our central parts facility offers next-day delivery with an industry-leading full-line first-pick rate of 97%.

warranties

To further help protect your investment; our warranties deliver complete peace of mind. As dependable as the trucks themselves, our standard and extended warranties provide you – and subsequent owners – with even lower operating costs and long-term insurance against unexpected repairs.

counterbalance trucks

diesel

Ranging from our flagship 1.5 to 5.5 tonne GRENDIA range, to our 'gentle giants' with capacities up to 16.0 tonnes, our diesel counterbalance engineering blends power and durability with operating economy, ergonomics and environmental friendliness.

The term 'Integrated Presence System' (IPS) is intended as a trading style, only to describe a number of design features on the Mitsubishi trucks to which IPS is applied. It does not imply that the truck can be driven without appropriate operator training and without due care and attention. The manufacturer (MCFE, Almere, the Netherlands) cannot accept any responsibility for any accidents or damage caused by incorrect or dangerous use of its equipment.

Performance specifications may vary depending on standard manufacturing tolerances, vehicle condition, types of tyres, floor or surface conditions, applications or operating environment. Trucks may be shown with non-standard options. Specific performance requirements and locally available configurations should be discussed with your distributor of Mitsubishi forklift trucks. Mitsubishi follows a policy of continual product improvement. For this reason, some materials, options and specifications could change without notice.
